Please find below and/or attached an Office communication concerning this application or proceeding.

#### Application No. Applicant(s) 09/963.493 BAYOT, ARTHUR ALLAN Office Action Summary Evamin r Art Unit 2823 W. David Coleman -- The MAILING DATE of this communication app ars on the cov r sheet with the correspondence address --Period for Reply A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed efter SIX (6) MONTHS from the mailing date of this communication If the period for reply specified above is less than thirty (30) days, e reply within the statutory minimum of thirty (30) days will be considered timely. If NO period for reply is specified above, the maximum statutory period will apply end will expire SIX (6) MONTHS from the meiling date of this communication Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office leter than three months after the mailing dete of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status 1) Responsive to communication(s) filed on 18 August 2003. 2a) This action is FINAL 2b) This action is non-final. 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims 4) Claim(s) 1-5 and 12-16 is/are pending in the application. 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration. Claim(s) is/are allowed. 6) Claim(s) 1-5 and 12-16 is/are rejected. 7) Claim(s) is/are objected to. 8) Claim(s) are subject to restriction and/or election requirement. Application Papers 9) The specification is objected to by the Examiner. 10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a). 11) The proposed drawing correction filed on \_\_\_\_\_ is: a) approved b) disapproved by the Examiner. If approved, corrected drawings are required in reply to this Office action. 12) The oath or declaration is objected to by the Examiner. Priority under 35 U.S.C. §§ 119 and 120 13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some \* c) None of: Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No. 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). \* See the attached detailed Office action for a list of the certified copies not received. 14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application). a) The translation of the foreign language provisional application has been received. 15) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

 Notice of Informal Patent Application (PTO-152)

#### DETAILED ACTION

### Response to Arguments

Applicant's arguments filed August 18, 2003 have been fully considered but they are not persuasive.

Applicants contend that the 35 U.S.C. 102(b) rejection of claim 1 is improper because Applicants elude that term "vibrating at least a portion of the substrate" is not disclosed by Chapman, et el., U.S. Patent 6,059,172 herein known as Chapman.

In response to Applicants contention that Chapman fails to recite the term "vibrating", Applicants are directed to column 2, lines 24-29 where Chapman clearly discloses a method of substantially aligning conductive bump contact areas with at least one conductive bump using a vibration method. Please note that Chapman clearly states that vibration, brushing and vacuum, in association with an alignment plate have been proposed for dealing with solder balls. Since the limitation is recited in the reference, Chapman meets Applicants claimed limitation.

## Claim Rejections - 35 USC § 102

 The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

 Claims 1 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Chapman et al., U.S. Patent 6,059,172. 3. <u>Chapman</u> discloses a semiconductor process as claimed. See FIGS. 1-5, where <u>Chapman</u> teaches a method of manufacturing a ball grid array semiconductor package comprising the steps

Page 3

of:

providing a substrate 10, wherein said substrate comprises a first surface and a second

surface and said first surface or said second surface comprises a conductor pattern;

providing a plurality of conductive bump contact areas 9 on said first surface of said

substrate;

substantially aligning each of said conductive bump contact areas with at least one

conductive bump 6, wherein the step of substantially aligning said conductive bump contact

areas with at least one of said conductive bumps comprises the step of vibrating at least a portion

of said substrate, wherein said vibration of at least a portion of said substrate substantially aligns

each of said conductive bump contact areas with at least one of said conductive bumps; and

disposing at least one of said conductor bumps on each of said conductive bump contact

areas (column 2, lines 24-39).

Pertaining to claim 12, Chapman discloses a method of manufacturing a ball grid array

semiconductor package comprising the steps of:

providing a substrate 10 wherein said substrate comprises a first surface and a second

surface and said first surface or said second surface comprises a conductive pattern;

providing a plurality of conductive bump contact areas 9 on said first surface of said

substrate;

substantially aligning each of said conductive bump contact areas with at least one

conductive bump, wherein the step of substantially aligning said conductive bump contact areas

with at least one of said substrate, wherein said vibration of at least a portion of said substrate substantially aligns each of said conductive bump contact areas with at least one of said conductive bumps;

disposing at least one of said conductive bumps on each of said conductive bump contact areas; and

reflowing said conductive bump disposed on said conductive bump contact areas (see column 2, lines1-4 for the reflow step).

### Claim Rejections - 35 USC § 103

- Claims 2, 3, 4,5, 13, 14, 15 and 16 rejected under 35 U.S.C. 103(a) as being unpatentable over Chapman et al., U.S. Patent 6,059,172 as applied to claim 1 above, and further in view of Kuroda et al., U.S. Patent 5,205,032.
- 5. Pertaining to claims 2 and 13, <u>Chapman</u> fails to teach the method of claims 1 and 12, wherein the step of vibrating at least a portion of said substrate comprises the step of ultrasonically vibrating at least a portion of said substrate. <u>Kuroda</u> teaches wherein the vibration comprises ultrasonic vibration. In view of <u>Kuroda</u>, it would have been obvious to one of ordinary skill in the art to incorporate ultrasonic vibration into the <u>Chapman</u> semiconductor process because ultrasonic vibration is a comprises a electromagnetic vibrating element (column 3, lines 65-68).
- Pertaining to claims 3 and 14, Chapman in view of <u>Kuroda</u> teaches the method of claims
  and 12, wherein the step of ultrasonically vibrating at least a portion of

said substrate comprises the step of ultrasonically vibrating a first end, a second end, and a third end of a film strip on which at least one of said substrates is disposed. In view of <u>Kuroda</u>,

Application/Control Number: 09/963,493

Art Unit: 2823

Page 5

it would have been obvious to one of ordinary skill in the art to incorporate ultrasonic vibration into the <u>Chapman</u> semiconductor process because ultrasonic vibration is a comprises a electromagnetic vibrating element (column 3, lines 65-68).

- 7. Pertaining to claims 4 and 15, <u>Chapman</u> in view of <u>Kuroda</u> teaches the method of claims 2 and 12, further comprising the step of discontinuing said ultrasonic vibration of at least a portion of said substrate when each of said conductive bump contact areas are substantially aligned with at least one of said conductive bumps. In view of <u>Kuroda</u>, it would have been obvious to one of ordinary skill in the art to incorporate ultrasonic vibration into the <u>Chapman</u> semiconductor process because ultrasonic vibration is a comprises a electromagnetic vibrating element (column 3, lines 65-68).
- Pertaining to claims 5 and 16, <u>Chapman</u> in view of <u>Kuroda</u> teaches the method of claims
  and 12, wherein said conductive bumps comprise solder.

#### Conclusion

- 9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
- 10. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Application/Control Number: 09/963,493 Page 6

Art Unit: 2823

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this

final action.

 Any inquiry concerning this communication or earlier communications from the examiner should be directed to W. David Coleman whose telephone number is 703-305-0004.

The examiner can normally be reached on 9:00 AM-5:00 PM.

12. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Olik Chaudhuri can be reached on 703-306-2794. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

13. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
